Expertise

- MERN/JAM Stack Development
- SaaS Platform Development
- Agile Methodologies:
- Frontend Developmen
- Project Management

Projects I built

Solarhub | solarize-e05e3.web.app

Created Solarhub (Platform that helps you figure, out how many plants do u need) using the MERN stack. Leveraged Netlify for deployment and implemented(CI/CD) with GitHub. Empowering sustainable energy solutions through a user-friendly platform.

UnicornCopy.AI | www.unicorncopy.ai

Led the development of "UnicornCopy.AI," a highly rated platform employing AI for fast and easy content creation (blogs, social media, website copy). Utilized MERN stack, designed the frontend, and deployed on Digital Ocean.

Health titan pro | www.healthtitanpro.com

Developed HealthTitanPro.com using MERN stack, deploying on AWS. As the sole frontend developer, streamlined COVID-19 test management for healthcare providers worldwide.

Work Experience

2019-2023 — **MERN/JAM stack developer | Chamber.Media**

Building and maintaining web applications using the MERN and JAM stack technologies, working with the development team, integrating APIs, enhancing code performance, and contributing to the development of successful advertising solutions were all part of my duties as a MERN/JAM stack developer at Chamber.media.

2018-2019 — **React Developer | Atlantic partners Ocean**

As a remote React Developer at Atlantic Partner's Ocean (APA), a Bangkok-based company, my responsibilities included designing and implementing user-friendly web applications using React.js, creating reusable components, integrating APIs, conducting code optimizations, and collaborating with cross-functional teams to ensure timely project delivery and seamless user experiences.

Education

2019-2024 — Bachelor in Computer Science

Reward

Oct 2021 | Chamber.Media
The Best Employee of the Year

Dec 2022 | Netlify Community
Women of JAMstack
